Some of these investments may be issued with warrants, which give the Fund the right, but not the obligation, to buy the underlying shares at particular price. The Fund may invest up to 5% in these warrants. The Investment Manager adds rigorous environment, social and corporate governance analysis for risk management. The Fund may declare dividends semi-annually on the following dates: 1 January and 1 July. The Fund is actively managed and is not managed in reference to a benchmark. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In addition to the risks captured by the indicator, an extended discussion of the risks associated with an investment in the Fund is set out in the Prospectus and in the Fund supplement to the Prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

WHAT HAPPENS IF IMPAX ASSET MANAGEMENT IRELAND LIMITED IS UNABLE TO PAY OUT?

J.P. Morgan SE – Dublin Branch (the “Depositary”) will perform safekeeping duties for the Fund’s assets. In the event of the insolvency of the PRIIP Manufacturer (Impax Asset Management Ireland Limited), the Fund’s assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary’s insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from its negligent or intentional failure properly to fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme in place which may offset all, or any of, this loss.

There is a greater likelihood of getting back less than the amount you invested if you redeem your shares before the end of the recommended holding period than if you hold them for the recommended holding period.
